Verbal Thinking: Building the Thinking-Communication Connection (Muscles of the Mind Program, Volume IV) by Marco Meirovitz, Stuart Dods ISBN 0898241936

Part of the *Muscles of the Mind* program:

This set of books aims to build and increase thinking skills through a structured and sophisticated program of games and entertaining activities, and shows how to apply these skills to a wide range of life situations. It can be used every year from preschool through adulthood with positive results.

- Deductive Logic: How to put together separate but related facts, eliminate irrelevant information, and reach a valid conclusion.

- Inductive Logic: How to discover rules by observing what is similar and different among many events.
- Memory: How to remember what has been learned and what one wishes to remember.
- Creative Thinking: How to develop new and different ideas.
- Planning: How to make plans, anticipate events, and organize efficiently to reach broad goals and to accomplish daily tasks.
- Psychomotor Activity: How to control your body movements and coordinate them with your thinking.
- Visualization: How to see in space, to imagine changes in spatial relations, to transfer images from two dimensions to three dimensions, and to observe carefully.
- Communication: How to transmit a clearly understood message, and how to avoid misunderstandings and misinterpretations.
- Problem Solving: How to create new ideas through critical thinking and logic and to make appropriate decisions to solve problems of everyday life.
