Giant Shark: Megalodon, the Super Prehistoric Predator by Caroline Arnold ISBN 0395914191

For millions of years, a massive shark more than twice as huge as the modern-day great white shark cruised the depths of the ocean, attacking and devouring prey. Fossil remains reveal megalodon to have been more than fifty feet long, with razor-sharp teeth, each the size of a human hand, and jaws so large it could swallow prey larger than a common dolphin. It was the biggest predatory shark ever. Award-winning author Caroline Arnold takes young readers deep beneath the prehistoric sea to investigate the habits of this monstrous shark. Fluid, detailed watercolors accompany this clear and accessible account of one of the most incredible creatures to inhabit our world. Index.
