The Science of Miracles: Investigating the Incredible by Joe Nickell ISBN 1616147415

An entertaining, comprehensive, and science-based study of miracle claims

Is the Shroud of Turin really the burial cloth of Jesus, produced by a miraculous burst of radiant energy at the moment of Resurrection? What happens at faith-healing services to provide apparently miraculous cures?

Steering between the twin pillars of belief and disbelief, experienced paranormal investigator Joe Nickell examines these claims and more. Relying on his forty-plus years of experience in tracking down the solutions to mysteries, Nickell uses on-site examinations, lab experiments, and other detective methods to uncover the facts behind the most incredible claims. He evaluates the

evidence in six major categories of miracle claims: miraculous images (such as "weeping" icons); magical relics (like the Shroud of Turin and the Holy Grail); miracle healings (at Lourdes or at the hands of healers like Benny Hinn); visionary experiences (including near-death experiences); saintly powers (such as stigmata); and "the devil's work" (such as demonic possession).

Conveying the sense of adventure surrounding the investigation of any mystery, this is both entertaining reading and a comprehensive, science-based study of miracle claims.
