Fire Bug Connection (Ecological Mysteries) by Jean Craighead George ISBN 0064404749

"When a raven, flies at you, there will, be a murder." That's what Maggie's grandmother once told her, and the longer twelve-year-old Maggie stays with her parents at the Biological Research Station--or Bug Camp, as she calls it--the more she believes it. Soon after a raven's appearance, something strange happens to Maggie's beautiful new fire bugs. Instead of molting into the next stage, the bugs grow grotesquely large and seem to be doomed. Is global warming the culprit? Acid rain? Or...murder? One thing is certain--it's an eco mystery, and Maggie, with the help of Mitch, a young computer whiz, must try to track down the killer. In this environmental whodunit, 12-year-old Maggie can't figure out why her exotic and beautiful new fire bugs are dying so suddenly. Is it global warming, acid rain, or murder? With the help a young computer whiz, Maggie tracks down each ecological clue in a mystery that is 'fascinating and (especially for budding naturalists)

inspiring."K.

Fire Bug Connection (Ecological Mysteries) Review
