Integral Closure of Ideals, Rings, and Modules (London Mathematical Society Lecture Note Series) by Irena Swanson, Craig Huneke ISBN 0521688604

Integral closure has played a role in number theory and algebraic geometry since the nineteenth century, but a modern formulation of the concept for ideals perhaps began with the work of Krull and Zariski in the 1930s. It has developed into a tool for the analysis of many algebraic and geometric problems. This book collects together the central notions of integral closure and presents a unified treatment. Techniques and topics covered include: behavior of the Noetherian property under integral closure, analytically unramified rings, the conductor, field separability, valuations, Rees algebras, Rees valuations, reductions, multiplicity, mixed multiplicity, joint

reductions, the Briançon-Skoda theorem, Zariski's theory of integrally closed ideals in two-dimensional regular local rings, computational aspects, adjoints of ideals and normal homomorphisms. With many worked examples and exercises, this book will provide graduate students and researchers in commutative algebra or ring theory with an approachable introduction leading into the current literature.

Integral Closure of Ideals, Rings, and Modules (London Mathematical Society Lecture Note Series) Review

This Integral Closure of Ideals, Rings, and Modules (London Mathematical Society Lecture Note Series) book is not really ordinary book, you have it then the world is in your hands. The benefit you get by reading this book is actually information inside this reserve incredible fresh, you will get information which is getting deeper an individual read a lot of information you will get. This kind of Integral Closure of Ideals, Rings, and Modules (London Mathematical Society Lecture Note Series) without we recognize teach the one who looking at it become critical in imagining and analyzing. Don't be worry Integral Closure of Ideals, Rings, and Modules (London Mathematical Society Lecture Note Series) can bring any time you are and not make your tote space or bookshelves' grow to be full because you can have it inside your lovely laptop even cell phone. This Integral Closure of Ideals, Rings, and Modules (London Mathematical Society Lecture Note Series) having great arrangement in word and layout, so you will not really feel uninterested in reading.
