How to write a scientific paper by George K. Toworfe PhD ISBN 1456451502

In an attempt to contribute to breaking the myth surrounding publication of scientific research findings, Dr. George K. Toworfe has put together information on how to write scientific papers, in this book. The information in this book has originated from pieces of information Dr. Toworfe has gathered over a long period of time as a result of the many years he has spent in cutting-edge scientific research and teaching. George has included sections from his own published data quoted from international scientific journals like Biomaterials and other Biomedical journals as well as from Conference Proceedings. You will find the examples very useful and informative. The chapters and sections in the book consist of a general overview of a research paper; how and what to write on the title page of your research paper; the nature of an attractive and informative abstract; writing an eye-catching introduction to an excellent research paper; how to properly outline and write up the materials and methods section of a scientific paper; the most comprehensive way of presenting the results of your findings in a scientific journal; discussing your research findings and drawing your

conclusions and the correct mode of listing your literature cited in the publication. This book will stimulate and motivate the reader as well as the scientist to publish his or her research data.
