La fibromialgia es una enfermedad reumatológica que se caracteriza por una sensibilidad agudizada en ciertos puntos del cuerpo y por la presencia de dolor crónico difuso. Aparece acompañada de malestar general, sueño no reparador, depresión y una larga lista de síntomas frecuentes. La fibromialgia afecta entre un dos y un cuatro por ciento de la población española y se calcula que unas 800.000 personas la padecen sin calcular además que, en nuestro país, alrededor del 90 % de los enfermos de fibromialgia no están diagnosticados. Tras un sucinto repaso de la historia de la fibromialgia y la exposición de los síntomas relacionados con ella, el

autor expone los tratamientos más eficaces para curarla.

After the author explains what fibromyalgia is and the symptoms of this disease, he brings to light the best treatments to cure it and also a good selection of addresses and web pages where the patient can ask for help to fight against this disease.
