Space Stations: Systems and Utilization by Ernst Messerschmid, Reinhold Bertrand ISBN 3642084796

Construction has begun on the International Space Station (ISS) the largest and most complex extraterrestrial construction project ever. This book on space stations, and the ISS in particular, describes component technologies, systems integration, and the potential utilization of these stations. Co-authored by Messerschmid, one of the first German astronauts, it addresses students and engineers in space technology, but will interest astronomy and space enthusiasts as well.
