Plant Growth and Health Promoting Bacteria (Microbiology Monographs) by ISBN 3642136117

To cope with the increasing problems created by agrochemicals such as plant fertilizers, pesticides and other plant protection agents, biological alternatives have been developed over the past years. These include biopesticides, such as bacteria for the control of plant diseases, and biofertilizer to improve crop productivity and quality. Especially plant growth promoting rhizobacteria (PGPR) are as effective as pure chemicals in terms of plant growth enhancement and disease control, in addition to their ability to manage abiotic and other stresses in plants. The various facets of these groups of bacteria are treated in this Microbiology Monograph, with emphasis on their emergence in agriculture. Further topics are *Bacillus* species that excrete peptides and lipopeptides with antifungal, antibacterial and surfactant activity, plant-bacteria-environment interactions, mineral-nutrient exchange, nitrogen assimilation, biofilm formation and cold-tolerant microorganisms.

## **Plant Growth and Health Promoting Bacteria (Microbiology Monographs) Review**

This Plant Growth and Health Promoting Bacteria (Microbiology Monographs) book is not really ordinary book, you have it then the world is in your hands. The benefit you get by reading this book is actually information inside this reserve incredible fresh, you will get information which is getting deeper an individual read a lot of information you will get. This kind of Plant Growth and Health Promoting Bacteria (Microbiology Monographs) without we recognize teach the one who looking at it become critical in imagining and analyzing. Don't be worry Plant Growth and Health Promoting Bacteria (Microbiology Monographs) can bring any time you are and not make your tote space or bookshelves' grow to be full because you can have it inside your lovely laptop even cell phone. This Plant Growth and Health Promoting Bacteria (Microbiology Monographs) having great arrangement in word and layout, so you will not really feel uninterested in reading.
