3D Computer Vision: Efficient Methods and Applications (X.media.publishing) by Christian Wöhler
ISBN 1447141490

This indispensable text introduces the foundations of three-dimensional computer vision and describes recent contributions to the field. Fully revised and updated, this much-anticipated new edition reviews a range of triangulation-based methods, including linear and bundle adjustment based approaches to scene reconstruction and camera calibration, stereo vision, point cloud segmentation, and pose estimation of rigid, articulated, and flexible objects. Also covered are intensity-based techniques that evaluate the pixel grey values in the image to infer three-dimensional scene structure, and point spread function based approaches that exploit the effect of the optical system. The text shows how methods which integrate these concepts are able to increase reconstruction accuracy and robustness, describing applications in industrial quality

inspection and metrology, human-robot interaction, and remote sensing.

3D Computer Vision: Efficient Methods and Applications (X.media.publishing) Review

This 3D Computer Vision: Efficient Methods and Applications (X.media.publishing) book is not really ordinary book, you have it then the world is in your hands. The benefit you get by reading this book is actually information inside this reserve incredible fresh, you will get information which is getting deeper an individual read a lot of information you will get. This kind of 3D Computer Vision: Efficient Methods and Applications (X.media.publishing) without we recognize teach the one who looking at it become critical in imagining and analyzing. Don't be worry 3D Computer Vision: Efficient Methods and Applications (X.media.publishing) can bring any time you are and not make your tote space or bookshelves' grow to be full because you can have it inside your lovely laptop even cell phone. This 3D Computer Vision: Efficient Methods and Applications (X.media.publishing) having great arrangement in word and layout, so you will not really feel uninterested in reading.
