Inequality: Radical Institutional Views on Race, Gender, Class, and Nation (Contributions in Economics and Economic History) by William M. Dugger ISBN 0313300143

Radical institutionalism—a processual paradigm focused on changing the direction of cultural evolution and the function of social provisioning in order to promote the full participation of all—defines inequality as evolving from class exploitation, gender domination, race discrimination, and national predation. Radical institutionalism states that inequality is not determined by genetic

differences between groups, innate differences between sexes, or class differences. It is believed that mainstream thinking in economics and related studies is not broad enough to capture the complexity of this social pathology.
