Smart Organizations and Smart Artifacts: Fostering Interaction Between People, Technologies and Processes (Lecture Notes in Information Systems and Organisation) (Volume 7) by ISBN 3319070398

This book offers a multidisciplinary strategy for finding new and more effective human-computer interaction approaches, in particular from a socio-technical perspective, that facilitate the

exploration and exploitation of benefits that information technologies (IT) offer organizations. Though the relationship between IT and organizations is certainly very strong, it is also one of the greatest obstacles to securing benefits from their interaction. The participation of organizational users in the planning and design stages of IT interfaces is the main area of human-computer interaction, where a wealth of contributions are positively enriching both the academic and management discussions. Thus, a new approach for managing this relationship is needed, one in which the different stakeholders are suitably taken into account. Moreover, the outstanding success of the 2.0 phenomenon offers an example of a relevant platform where human-computer interaction has been widely developed and exploited. Consequently, this will influence and already is influencing – the way IT and users interact with each other. The book is based on a selection of the best papers – original, double blind peer-reviewed contributions – from the annual conference of the Italian chapter of the AIS, held in Milan, Italy in December 2013.

Smart Organizations and Smart Artifacts: Fostering Interaction Between People, Technologies and Processes (Lecture Notes in Information Systems and Organisation) (Volume 7) Review

This Smart Organizations and Smart Artifacts: Fostering Interaction Between People, Technologies and Processes (Lecture Notes in Information Systems and Organisation) (Volume 7) book is not really ordinary book, you have it then the world is in your hands. The benefit you get by reading this book is actually information inside this reserve incredible fresh, you will get information which is getting deeper an individual read a lot of information you will get. This kind of Smart Organizations and Smart Artifacts: Fostering Interaction Between People, Technologies and Processes (Lecture Notes in Information Systems and Organisation) (Volume 7) without we recognize teach the one who looking at it become critical in imagining and analyzing. Don't be worry Smart Organizations and Smart Artifacts: Fostering Interaction Between People, Technologies and Processes (Lecture Notes in Information Systems and Organisation) (Volume 7) can bring any time you are and not make your tote space or bookshelves' grow to be full because you can have it inside your lovely laptop even cell phone. This Smart Organizations and Smart Artifacts: Fostering Interaction Between People, Technologies and Processes (Lecture Notes in Information Systems and Organisation) (Volume 7) having great arrangement in word and layout, so you will not really feel uninterested in reading.
