The Politics of International Criminal Justice: German Perspectives from Nuremberg to The Hague (Studies in International Law) by Ronen Steinke ISBN 1849463131

For those interested in exploring the entanglement of international criminal justice with the interests of States, Germany is a particularly curious, exemplary case. Although a liberal democracy since 1949, its political position has been altered radically in the last 60 years. Starting from a position of harsh scepticism in the years following the Nuremberg Trials, and opening up to the rationales of international criminal justice only slowly - and then mainly in the context of domestic trials against functionaries of the former East German regime after 1990 - Germany is today one of the most active supporters of the International Criminal Court (ICC). The climax of this is its campaigning to

make the ICC independent of the UN Security Council - a debate in which Germany took a position in stark contrast to the US. This book is a readable and interesting study of Germany's curious relationship with international criminal justice, offering new insight into the debates leading up to such policy shifts. Drawing on government documents and interviews with policymakers, it enriches a broader debate on the politics of international criminal justice, which has to date often been focused primarily on the US.
