Rangeland Desertification (Advances in Vegetation Science) by ISBN 904815359X

Desertification has occurred worldwide. The biophysical and socio-economic complexity of this phenomenon has challenged our ability to categorize, inventory, monitor and repair the condition of degraded lands. One of the most important distinctions to be made in relation to land degradation is between cultivated land used for annual crop production and 'rangelands'. Grazing by free-roaming livestock is the traditional primary use of the world's rangelands. However, there is growing recognition of the importance of these vast acreages for wildlife habitat, hydrology and ground water recharge, recreation and aesthetics.

This text focuses on the desertification of rangelands and explores processes, problems and solutions. Chapters in the first section evaluate interactions between 'natural' and human-induced disturbance regimes, thresholds, and non-linear change with respect to vegetation, hydrology,

nutrients and erosion. Chapters in the second section examine socio-economic constraints and approaches for preventing and reversing degradation.

The book provides a contemporary, process-oriented perspective on rangeland degradation of value to students, policy-makers and professionals alike.

## **Rangeland Desertification (Advances in Vegetation Science) Review**

This Rangeland Desertification (Advances in Vegetation Science) book is not really ordinary book, you have it then the world is in your hands. The benefit you get by reading this book is actually information inside this reserve incredible fresh, you will get information which is getting deeper an individual read a lot of information you will get. This kind of Rangeland Desertification (Advances in Vegetation Science) without we recognize teach the one who looking at it become critical in imagining and analyzing. Don't be worry Rangeland Desertification (Advances in Vegetation Science) can bring any time you are and not make your tote space or bookshelves' grow to be full because you can have it inside your lovely laptop even cell phone. This Rangeland Desertification (Advances in Vegetation Science) having great arrangement in word and layout, so you will not really feel uninterested in reading.
