History of Environmental Economic Thought by Erhun Kula ISBN 0415406854

This volume presents the ideas of major figures in economics throughout history on key environmental issues such as population growth, resource scarcity and environmental contamination. Throughout, the historical roots of current debates are explored with empirical case studies illustrating the link between theory and practice. The final chapters look at current ideas on sustainability, and ethical and spiritual dimensions of humanity's relationship with the environment. Providing fascinating insight into the development of environmental economic thought, this volume will be of great interest to students and researchers in the history of economic thought and environmental economics.
