Metal Building Systems, Third Edition: Design and Specifications by Alexander Newman ISBN 0071828966

## **The most complete, up-to-date metal building systems guide**

Fully revised for the latest building codes and industry trends, *Metal Building Systems*, Third Edition, explains how to select, specify, and design preengineered buildings with confidence. In this book, a practicing structural engineer goes beyond manufacturer-supplied specifications to provide impartial and objective information that can save you money and time.

A new chapter on anchor bolts and embedments, many new illustrations, plus new and updated design examples, are included in this practical reference. End-of-chapter review questions

reinforce the material presented. This is an essential resource for architects, engineers, construction specifiers, design professionals, facility managers, building officials, and contractors working with metal building systems.

**COMPREHENSIVE COVERAGE INCLUDES:**

- Structural loads and design methods
- Structural system selection criteria
- Primary framing
- Secondary framing: girts and purlins
