Epilepsy Part I: Basic Principles and Diagnosis, Volume 107: Handbook of Clinical Neurology by ISBN 0444528989

Epilepsy, Part I, *Basic Principles and Diagnosis*, Volume 107, in the *Handbook of Clinical Neurology* series offers a comprehensive review of our knowledge of the field today, including epidemiology, basic mechanisms, animal models, and topics of increasing interest such as the role of inflammation in epilepsy. It provides a comprehensive approach to description of the clinical, electrographic and imaging aspects of the epilepsies, with a clear outline of contemporary classification and the role of modern diagnostic techniques, as well as neuropsychological and

psychiatric aspects of epilepsy. Chapters are authored by internationally respected neurologists with varied perspectives insuring depth to the content. *Epilepsy, Part II, Treatment*, Volume 108, continues coverage of epilepsy with a focus on treatment. The volumes will be a very important resource for basic scientists, clinical investigators, and all health professionals treating patients with epilepsy.

*A volume in the Handbook of Clinical Neurology series, which has an unparalleled reputation as the world's most comprehensive source of information in neurology.

*International list of contributors including the leading workers in the field.

*Describes the advances which have occurred in clinical neurology and the neurosciences, their impact on the understanding of neurological disorders and on patient care.
