Seapower: A Guide for the Twenty-First Century (Cass Series: Naval Policy and History) by Geoffrey Till ISBN 041562262X

This is the third, revised and fully updated, edition of Geoffrey Till's *Seapower: A Guide for the 21st Century*.

The rise of the Chinese and other Asian navies, worsening quarrels over maritime jurisdiction and the United States' maritime pivot towards the Asia-Pacific region reminds us that the sea has always been central to human development as a source of resources, and as a means of

transportation, information-exchange and strategic dominion. It has provided the basis for mankind's prosperity and security, and this is even more true in the early 21st century, with the emergence of an increasingly globalized world trading system. Navies have always provided a way of policing, and sometimes exploiting, the system. In contemporary conditions, navies, and other forms of maritime power, are having to adapt, in order to exert the maximum power ashore in the company of others and to expand the range of their interests, activities and responsibilities. While these new tasks are developing fast, traditional ones still predominate. Deterrence remains the first duty of today's navies, backed up by the need to 'fight and win' if necessary. How navies and their states balance these two imperatives will tell us a great deal about our future in this increasingly maritime century. This book investigates the consequences of all this for the developing nature, composition and functions of all the world's significant navies, and provides a guide for anyone interested in the changing and crucial role of seapower in the 21st century.

*Seapower* is essential reading for all students of naval power, maritime security and naval history, and highly recommended for students of strategic studies, international security and International Relations.

## **Seapower: A Guide for the Twenty-First Century (Cass Series: Naval Policy and History) Review**
