The Primary Curriculum: Learning from International Perspectives by ISBN 041515832X

This book is concerned with the relationships and tensions in education between children's needs and societies' demands, questions which primary teachers everywhere face on a daily basis, such as:

- * how does society's view of children and childhood affect teaching and learning?
- * how do the dictates of the education system, including a national curriculum, shape teaching practice?
- * how do the conventions of classroom practice fit with teachers' own beliefs and values?

The first part of the book offers a basic framework for thinking about primary curricula from the perspectives raised by these questions, whilst the second part presents a range of international views on the primary curriculum from Australia, New Zealand, South-East Asia, Europe and the

USA.
