Reclaim the Joy of Practice: An Advanced Guide for Advancing Doctors by Dr Tom Potisk ISBN B00B4EB51Y

When was the last time you experienced that joy as a doctor? Being a doctor has become more challenging than ever before, yet some doctors are thriving and overflowing with joy.

I've spent years searching out, visiting, observing, and interviewing dozens of doctors that have the abundant, stable, and overwhelming joy that we all want and need. I discovered a system that is learn-able and practical for any doctor to implement. As a result of utilizing the system myself, both my practice and my life have been nothing short of extraordinary.

In response to the common question I'm asked "How did you do all that?"; I'm now assisting other doctors with the system I developed called Reclaim the Joy of Practice.

This program is not for every doctor. If you are content with what you're doing – keep up the good

work! But if you want to be able to throw your arms up in the air, jump up and down and scream with the joy that can and should come with the satisfaction of being a doctor, this program is designed to get you there or at least a lot closer to it. I did it – you're next!

Nor is this program like any other practice management, business development, marketing, or executive training system you may have participated in previously. Those have their benefits, but the Reclaim the Joy of Practice program focuses on what those others miss – a doctor's heart and soul. Ultimately, this program is about helping you grow to become a better person overall. If your family, staff, and patients heard about you doing this they would applaud.

This book, although written by and aimed at Chiropractors, needs to be read by every doctor.

If you are not a doctor but perhaps a patient, spouse or friend; this book makes an excellent gift!
