The Life and Letters of Faraday, Vol. 2 of 2 (Classic Reprint) by Bence Jones ISBN 1330929500
Excerpt from The Life and Letters of Faraday, Vol. 2 of 2

It will be the object of this chapter first to describe the great scientific work which Faraday did at this period; secondly, by means of his titles and the letters which he received, to show the reputation he obtained in consequence of his discoveries; and thirdly, as far as possible by means of his own letters, to give a picture of the character which he made and kept during the time of his great success.

On August 29, 1831, Faraday began his 'Electrical Researches.'

In December 1824 he believed with all his energy that as voltaic electricity powerfully affects a magnet, so the magnet ought to exert a reaction upon the electric current. Guided by this idea, he made an experiment, of which one part (the passage of a magnet through a metallic helix connected with a galvanometer), if separated from the rest of the experiment, would then have made the great discovery of magneto-electricity.

About the Publisher

Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com

This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
