Process Intensification Technologies for Biodiesel Production: Reactive Separation Processes (SpringerBriefs in Applied Sciences and Technology) by A. A. Kiss ISBN 3319035533

This book is among the first to address the novel process intensification technologies for biodiesel production, in particular the integrated reactive separations. It provides a comprehensive overview illustrated with many industrially relevant examples of novel reactive separation processes used in the production of biodiesel (e.g. fatty acid alkyl esters): reactive distillation, reactive absorption,

reactive extraction, membrane reactors, and centrifugal contact separators. Readers will also learn about the working principles, design and control of integrated processes, while also getting a relevant and modern overview of the process intensification opportunities for biodiesel synthesis.

Biodiesel is a biodegradable and renewable fuel that currently enjoys much attention. In spite of the recent advances, the existing biodiesel processes still suffer from problems associated with the use of homogeneous catalysts (e.g. salt waste streams) and the key limitations imposed by the chemical reaction equilibrium, thus leading to severe economic and environmental penalties. The integration of reaction and separation into one operating unit overcomes equilibrium limitations and provides key benefits such as low capital investment and operating costs. Many of these processes can be further enhanced by heat-integration and powered by heterogeneous catalysts, to eliminate all conventional catalyst related operations, using the raw materials efficiently and the reaction volume, while offering high conversion and selectivity, and significant energy savings.

The targeted audience of this book includes both academia (students and researchers) and industry (project leaders, technology managers, researchers, biodiesel producers, and equipment suppliers).

## **Process Intensification Technologies for Biodiesel Production: Reactive Separation Processes (SpringerBriefs in Applied Sciences and Technology) Review**

This Process Intensification Technologies for Biodiesel Production: Reactive Separation Processes (SpringerBriefs in Applied Sciences and Technology) book is not really ordinary book, you have it then the world is in your hands. The benefit you get by reading this book is actually information inside this reserve incredible fresh, you will get information which is getting deeper an individual read a lot of information you will get. This kind of Process Intensification Technologies for Biodiesel Production: Reactive Separation Processes (SpringerBriefs in Applied Sciences and Technology) without we recognize teach the one who looking at it become critical in imagining and analyzing. Don't be worry Process Intensification Technologies for Biodiesel Production: Reactive Separation Processes (SpringerBriefs in Applied Sciences and Technology) can bring any time you are and not make your tote space or bookshelves' grow to be full because you can have it inside your lovely laptop even cell phone. This Process Intensification Technologies for Biodiesel Production: Reactive Separation Processes (SpringerBriefs in Applied Sciences and Technology) having great arrangement in word and layout, so you will not really feel uninterested in reading.
