Dead Reckoning: The New Science of Catching Killers by Michael M.D. Baden, Marion Roach
ISBN 0684852713

For most people, the forensic sciences are something reported on the news when a crime is solved through DNA evidence, or used as a plot twist for television shows. But behind the crime-scene tape and the doors of the morgue is a world never seen by the public. Now famed pathologist and medical examiner Dr. Michael Baden and award-winning writer Marion Roach take readers into the laboratory, above the autopsy table, onto the witness stand and out in the field to show how advances in forensic science can solve crucial questions in a criminal case, often with startling accuracy.

Baden and Roach reveal how a key clue to the killer of Nicole Brown Simpson was lost when her body was moved to the morgue, and why the JonBenet Ramsey case can never be solved. They

show how no clue is too small to be analyzed and no case too old to be reopened. Full of behind-the-scenes drama and surprising revelations, Dead Reckoning is a fascinating look at how forensic science is changing the way we convict the guilty and free the innocent.
