Hypernatural: Architecture's New Relationship with Nature (Architecture Briefs) by ISBN 1616892722

Despite the ever-growing sophistication of synthetic and digital tools, it's the natural world that captures the imaginations of today's vanguard designers. By looking to nature as a teacher rather than simply as a source for raw materials, pioneers in the emerging biomimicry movement are developing design methods and materials to create intelligent buildings that emulate life itself.

In *Hypernatural* architecture and material experts Blaine Brownell and Marc Swackhamer present an international collection of forty-two case studies that illustrate astonishing new applications

possible in this rapidly growing field, from Echoviren, a botanical pavilion that was designed to wilt into its surrounding redwood forest in Northern California, to the MIT Media Lab's Silk Pavilion, constructed by the threads of silkworms as they passed over scaffolding. Together, these projects show that by looking to nature, design can be a tool that makes our built environment more efficient, sustainable, and, most of all, livable.

Hypernatural: Architecture's New Relationship with Nature (Architecture Briefs) Review

This Hypernatural: Architecture's New Relationship with Nature (Architecture Briefs) book is not really ordinary book, you have it then the world is in your hands. The benefit you get by reading this book is actually information inside this reserve incredible fresh, you will get information which is getting deeper an individual read a lot of information you will get. This kind of Hypernatural: Architecture's New Relationship with Nature (Architecture Briefs) without we recognize teach the one who looking at it become critical in imagining and analyzing.
