A Funny Thing Happened on the Way to School: Education! by Tamera D. Swedlund ISBN B00M8LEO3S

A Funny Thing Happened on the Way to School: Education! is about one woman's journey from homeschooling her children to home-educating them, or rather, allowing them to educate themselves (within certain guidelines) by following their own interests and curiosity.

Most new homeschooling parents set up a schoolroom complete with desks, a chalkboard, and a stack of workbooks to get through each day. Often this leads to boredom for the children and, more often, to frustration and angst building between a loving parent and her offspring.

The fact of the matter is that children have an innate willingness and desire to learn new things.

Think of all the things children learn between birth and kindergarten; most notably, a language!

This little book gives an honest and humble account of the many mistakes the author made in her first few years of homeschooling. It chronicles the various things that triggered her to set her family free from rote memorization and workbooks to allowing her children to pursue their own interests and, unwittingly, educate themselves in ways she never could have.

Also, sprinkled throughout the book are delightful quotes from famous classics that compare schooling to educating, as well as quotes about different famous historical people that were educated at home while they were youngsters.

If you are a homeschooling parent or considering it, this book will encourage you that, yes, you can do it, and yes, you can have fun doing it!
