Monitoring Ecosystems: Interdisciplinary Approaches for Evaluating Ecoregional Initiatives by ISBN 1559638516

This volume brings together leading scientists and researchers to offer a synthesis of lessons learned about ecological monitoring in major ecoregional initiatives around the United States. Contributors present insights and experiences gained from their work in designing, developing and implementing comprehensive ecosystem monitoring programmes in Pacific Northwest, the lower Colorado River Basin, and the Florida Everglades. The book: outlines the conceptual and scientific underpinnings for regional-scale ecosystem monitoring; examines the role and importance of data management, modelling and integrative analyses; and considers techniques for and experience with monitoring habitats, populations and communities. Chapters by the editors synthesize and

expand on points made throughout the volume and present recommendations for establishing frameworks for monitoring across scales, from local to international.
