African Empires in Ancient America by Dr. Clyde Winters ISBN 0615796583

African Empires in Ancient America tells the story of the numerous African groups who colonized Mexico, North and South America. Today most people believe that African people never voyaged outside Africa except as slaves. This is false, the Dafuna boat discovered in Nigeria dates back to 12,000 BC. And hundreds of ancient African boats have been engraved on rocks in the Sahara desert. Boats from Magan (Egypt) and Meluhha (Kush-East Africa) are mentioned in Sumerian cuneiform text. In this book you will discover that Africans have a long tradition of sea exploration and founded many of the major American civilizations. Although many people have heard about the possible discovery of America by Mansa Abubakari of the Mali Empire, and the giant Olmec heads of Mexico, Dr. Clyde Winters gives a detailed account of the Malian colonies established by these West Africans in North America and Brazil. You will discover the role of the Xi, or Olmec people as the Mother Culture of Mexico. Dr. Winters outlines the Axumite discovery of America, and the role of the Ethiopians in the rise of Mochica civilization and religion. In addition, this book

discusses the ancient Sumerian influence in South America, and the African role as Mound Builders in the United States. African Empires in Ancient America is the only book that finally explores the history of Black colonization of the Americas before Columbus. It is a must read for anyone interested in a true history of America.
