Handbook of Families and Aging by Rosemary Blieszner, Victoria Hilkevitch Bedford ISBN 1440828636

This book is both an updated version of and a complement to the original *Handbook of Families and Aging*. The many additions include the most recent demographic changes on aging families, new theoretical formulations, innovative research methods, recent legal issues, and death and bereavement, as well as new material on the relationships themselves—sibling, partnered, and intergenerational relationships, for example. Among the brand-new topics in this edition are step-family relationships, aging families and immigration, aging families and 21st-century technology, and peripheral family ties.

Unlike the more cursory summaries found in textbooks, the essays within *Handbook of Families and Aging, Second Edition* provide thoughtful, in-depth coverage of each topic. No other book

provides such a comprehensive and timely overview of theory and research on family relationships, the contexts of family life, and major turning points in late-life families. Nevertheless, the contents are written to be engaging and accessible to a broad audience, including advanced undergraduate students, graduate students, researchers, and gerontology practitioners. Serious lay readers will also find this book highly informative about contemporary family issues.
