Crop Production for Agricultural Improvement by ISBN 9400741154

In the recent years, the looming food scarcity problem has highlighted plant sciences as an emerging discipline committed to devise new strategies for enhanced crop productivity. The major factors causing food scarcity are biotic and abiotic stresses such as plant pathogens, salinity, drought, flooding, nutrient deficiency or toxicity which substantially limit crop productivity world-wide. In this scenario, strategies should be adopted to achieve maximum productivity and economic crop returns. In this book we have mainly focused on physiological, biochemical, molecular and genetic bases of crop development and related approaches that can be used for crop improvement under environmental adversaries. In addition, the adverse effects of different biotic (diseases, pathogens etc.) and abiotic (salinity, drought, high temperatures, metals etc) stresses on crop development and the potential strategies to enhance crop productivity under

stressful environments are also discussed.

## **Crop Production for Agricultural Improvement Review**

This Crop Production for Agricultural Improvement book is not really ordinary book, you have it then the world is in your hands. The benefit you get by reading this book is actually information inside this reserve incredible fresh, you will get information which is getting deeper an individual read a lot of information you will get. This kind of Crop Production for Agricultural Improvement without we recognize teach the one who looking at it become critical in imagining and analyzing. Don't be worry Crop Production for Agricultural Improvement can bring any time you are and not make your tote space or bookshelves' grow to be full because you can have it inside your lovely laptop even cell phone. This Crop Production for Agricultural Improvement having great arrangement in word and layout, so you will not really feel uninterested in reading.
