Detecting Peripheral-based Attacks on the Host Memory (T-Labs Series in Telecommunication Services) PDF

Detecting Peripheral-based Attacks on the Host Memory (T-Labs Series in Telecommunication Services) by Patrick Stewin ISBN 3319135147

This work addresses stealthy peripheral-based attacks on host computers and presents a new approach to detecting them. Peripherals can be regarded as separate systems that have a dedicated processor and dedicated runtime memory to handle their tasks. The book addresses the problem that peripherals generally communicate with the host via the host's main memory, storing cryptographic keys, passwords, opened files and other sensitive data in the process – an aspect attackers are quick to exploit.

Here, stealthy malicious software based on isolated micro-controllers is implemented to conduct an attack analysis, the results of which provide the basis for developing a novel runtime detector. The detector reveals stealthy peripheral-based attacks on the host's main memory by exploiting certain hardware properties, while a permanent and resource-efficient measurement strategy ensures that the detector is also capable of detecting transient attacks, which can otherwise succeed when the applied strategy only measures intermittently. Attackers exploit this strategy by attacking the system in between two measurements and erasing all traces of the attack before the system is measured again.

Detecting Peripheral-based Attacks on the Host Memory (T-Labs Series in Telecommunication Services) Review

This Detecting Peripheral-based Attacks on the Host Memory (T-Labs Series in Telecommunication Services) book is not really ordinary book, you have it then the world is in your hands. The benefit you get by reading this book is actually information inside this reserve incredible fresh, you will get information which is getting deeper an individual read a lot of information you will get. This kind of Detecting Peripheral-based Attacks on the Host Memory (T-Labs Series in Telecommunication Services) without we recognize teach the one who looking at it become critical in imagining and analyzing. Don't be worry Detecting Peripheral-based Attacks on the Host Memory (T-Labs Series in Telecommunication Services) can bring any time you are and not make your tote space or bookshelves' grow to be full because you can have it inside your lovely laptop even cell phone. This Detecting Peripheral-based Attacks on the Host Memory (T-Labs Series in Telecommunication Services) having great arrangement in word and layout, so you will not really feel uninterested in reading.
